SUMMARY

Backend engineer with 3+ years of remote experience building REST APIs, integrations and internal tools with Python/Django, NestJS, Laravel and Java. Experienced in SWIFT/ISO 20022 financial messaging, electronic invoicing with SATCOM, Siigo and Alegra, SQL on PostgreSQL, MySQL and Oracle, queue-based processing and L2/L3 production support with root cause analysis. Currently working in BI and data analytics with Power BI, Tableau and Python.

WORK EXPERIENCE

BI and Data Analytics Intern

Jul. 2026 – Present

Keyrus Colombia

Remote

- Designed and built an internal Django application that analyzes files and estimates effort for the team.
- Built its REST API with DRF, background processing with Celery and Redis and PostgreSQL persistence, with automated tests in GitHub Actions.
- Prepared and validated data with SQL and Python for dashboard analysis.

Freelance Full Stack Developer

Feb. 2025 – Mar. 2026

TotalDev SAS

Remote

- Added SWIFT MT support to an interbank gateway in Java/Apache Camel: MT103 and MT202 validation and automated ISO 20022 conversion.
- Developed the core modules of an electoral inventory platform in Laravel and React: bulk imports with row-level validation, regional permissions, Excel reports and queued PDF generation.
- Built a QR-scanning PWA for the operators of an industrial plant and its Laravel/Filament backend, with approvals, PDF delivery notes and monthly inventory reports.

Full Stack Developer

Nov. 2024 – Jul. 2025

PARQ

Remote

- Extended the SATCOM, Siigo and Alegra electronic invoicing connectors in a Laravel middleware with queued resend of failed invoices and per-request tracing.
- Maintained the NestJS and PostgreSQL services of a parking platform in Colombia, Mexico and the UK: country-specific rates, queued bulk membership creation and consistent timezones in reports.
- Built the corporate Next.js site with SSR, i18n and SEO and documented the APIs with OpenAPI.

Backend Developer

Jan. 2023 – Nov. 2024

SEREMPRE

Remote

- Diagnosed L2/L3 production incidents by tracing each failure through SQL, code review and Sentry, and documented its root cause.
- Built Laravel APIs for a benefits platform in more than five Latin American countries, with queues for validated payment uploads, duplicate cleanup and notifications.
- Wrote queries, PL/SQL procedures and Excel exports for other teams, and containerized legacy systems with Docker/DDEV.

EDUCATION

Bachelor of Engineering in Systems and Computer Engineering

Expected 2026

Universidad Pedagógica y Tecnológica de Colombia (UPTC)

Tunja, Colombia

Technologist in Information Systems Analysis and Development

2022

Servicio Nacional de Aprendizaje (SENA)

Tunja, Colombia

TECHNICAL SKILLS

Languages: Python, TypeScript, PHP, Java, SQL

Backend: Django, DRF, Celery, NestJS, Laravel, Filament, Apache Camel, REST, OpenAPI

Data: PostgreSQL, MySQL, Oracle PL/SQL, Redis, pandas, Excel, Power BI, Tableau

Operations: L2/L3 diagnosis, Sentry, Docker, Portainer, GitHub Actions, Linux

Spoken languages: Spanish (native), English (B2)
