

GABRIEL FERNANDO CASTILLO MENDIETA

Tunja, Boyacá, Colombia | gabo8191@gmail.com | [linkedin.com/in/gabodev8191](https://www.linkedin.com/in/gabodev8191)

PROFESSIONAL SUMMARY

Backend Developer with 3+ years of experience building scalable REST APIs, microservices architectures, and containerized applications with Laravel, NestJS and Python, with hands-on experience in Docker, AWS, CI/CD pipelines, and Linux server administration. Currently working in business intelligence consulting, applying SQL and Python to data preparation and building dashboards in Tableau and Power BI. Combines engineering judgment about data at the source with visual analytics on top of it.

EXPERIENCE

BI & Data Analytics Intern

Aug. 2026 – Present

Keyrus Colombia S.A.S.

Remote

- Designs and maintains interactive dashboards and reports in Tableau and Power BI within the Visualization team, applying visualization and data-storytelling principles for clients in retail, telecommunications, healthcare, energy and the public sector.
- Writes SQL queries with joins, aggregations and subqueries to extract, transform and validate data from enterprise sources such as Snowflake, SAP HANA, BigQuery and relational databases.
- Prepares and cleans datasets with Python (pandas, NumPy), Power Query and Tableau Prep, ensuring consistency before analysis.
- Documents processes, KPI definitions and analytical methodologies to give traceability and standardization to the team's projects.

Fullstack Developer

Jul. 2025 – March 2026

TotalDev SAS

Remote

- Developed an interbank messaging system that receives and processes MT format files, validates encryption status, standardizes data formats, and routes messages according to SWIFT/ISO 20022 specifications.
- Built backend systems for inventory management handling product catalogs with REST APIs, automated CSV import/export, role-based access control by geographic regions, and reporting modules with SQL views for query optimization.
- Created QR code generation and validation systems for event management and product authentication, and implemented content management systems with Laravel and Filament so non-technical users could manage the site autonomously.

Fullstack Developer

Nov. 2024 – Jul. 2025

PARQ

Remote

- Maintained and evolved a microservice architecture with NestJS and TypeORM, performing code audits, refactoring legacy code, and resolving data inconsistencies in production databases.
- Developed electronic invoicing middleware integrating with Colombian providers (Siigo, Alegra, SATCOM), implementing transaction logging and error handling for regulatory compliance.
- Implemented pagination, queue-based bulk loading and scheduled jobs with timezone handling for automated reports and notifications; documented APIs with Swagger/OpenAPI and managed deployments through Docker and Portainer.

Backend Developer

Jan. 2023 – Nov. 2024

SEREMPRE

Remote

- Built backend systems for a corporate benefits platform serving multiple Latin American countries, developing REST APIs consumed by both mobile and web applications.
- Designed complex MySQL queries and stored procedures for reporting systems, and configured automated cron jobs for user administration and scheduled notifications.
- Migrated legacy systems to containerized environments using Docker (DDEV), applying database normalization and query optimization for batch workloads, and integrated external APIs (Cloudinary, Moodle LTI) with custom plugins.

EDUCATION

Systems and Computer Engineering

Expected 2026

Pedagogical and Technological University of Colombia

Tunja, Boyacá

Relevant Coursework: Databases, Distributed Systems, Computer Networks, Computer Security.

Information Systems Analysis and Development

2022

National Learning Service (SENA)

Tunja, Boyacá

TECHNICAL SKILLS

Languages: Python, TypeScript, PHP, SQL, Bash

BI & Data: Tableau, Power BI, Analytical SQL, pandas, Power Query, Tableau Prep, Data Modelling, KPIs

Backend: Laravel, NestJS, Node.js, REST API Design, Microservices Architecture

Databases: PostgreSQL, MySQL, Redis, TypeORM, Eloquent ORM, Query Optimization

DevOps/Cloud: Docker, Kubernetes, AWS (EC2, S3, RDS), CI/CD, GitHub Actions, Nginx, Linux

Tools: Git, Swagger/OpenAPI, SonarQube, Portainer, Bitbucket **Spoken:** Spanish (Native), English (B2)
